UL Listed 1640

# Power Distribution

We have been designing and manufacturing UL 1640 Listed power distribution equipment for nearly a decade. Our designs range from 110v spider boxes with Edison outlets to 800 amp rated show power distribution to feed motors, lighting, a/v or sound. The unit is built to customer specification into a fully enclosed chassis for use as a standalone box or mounted into a rack case.

Custom designs can be developed and warehoused for assembly when required by the customer, shortening turnaround time and reducing costs.

Company switch panels, load centers and custom designed connector panels are also available for installations. UL and C/UL 508A Listing is provided for these panels.

Give us your wish list and we will make it a reality.

**USES:**

- Show power
- Corporate events
- Theatrical installation
- Lighting & control
- Sound
- Audio Visual
- Motor power & control
- Video Walls
